

Provider Communication

Subject: Perinatal Case Management/ Pregnancy Related Service	Priority: High
Date: May 26, 2005	Message ID: ACSBNR05262005_1

Dear Provider,

Effective immediately, PCM and PRS Questionnaires used for the sole purpose of adding additional staff should no longer be mailed to The Department of Community Health.

Part II, section 603C of the PCM Manual states:

“After initial enrollment, the agency must ensure that subsequent hires meet all qualifications and must maintain written evidence of those qualifications”.

Written approval will no longer be provided for newly employed staff after initial enrollment as stated in Part II, section 601.3 of the PRS Manual.

The agency will continue to require a PCM training certificate and documentation of PRS preceptorship for each employee providing services.

Thank you for your continued participation in Georgia’s Medicaid/PeachCare for Kids Program.

Sincerely,

Department of Community Health
